GENERAL ORGANICS®
CONFORMS TO THE EUROPEAN REGULATION ON ORGANIC CULTIVATION
N° 834/2007
www.eurohydro.com

General Organics provides gardeners with a complete line of superior plant foods and supplements for soil, also adapted to hydroponics.

The nutrients

BioThrive Grow maximizes vegetative growth by supplying plants with a custom diet that stimulates vigorous root and foliage development.

BioThrive Bloom provides flowering and fruiting plants with essential nutrients, perfectly balanced for superior blooms and bountiful harvests.

The supplements

BioRoot Plus: natural root activator

BioBud: flowering stimulator

BioWorm: especially in folliar spray, enhances soil and substrates

BioWeed: soil and plant vitality enhancer

Urtica, for its high content in mineral salts, and especially in silicate

Diamond Black, improves nutrient absorption

BM, Trichoderma harzianum, optimizes decomposition of organic matter.

APPLICATIONS:

As a general rule:

- Adjust your water to a **pH** of 5.5 to 6.5. Verify your pH level regularly. To stabilize your pH, use our liquid pH Down, as it contains organic buffers.
- **Shake well before using :** our nutrients are extremely concentrated.

For seeds (all substrates):

- As soon as the first roots appear, apply the dosage for «cuttings», in the application chart.
- As soon as growth resumes, apply the dosage for «vegetative».

For pure growth, and for mother plants:

- Apply the same dosage as for the first week of flowering.
